

PIN PLACEMENT INDICATORS

In case you were wondering, the little yellow flag on the flagsticks is there to give players a general indication of the position of the Flagstick on the green. They are not cosmetic and are positioned by Greens Staff each day when the pin is changed. The flaglets are only held in position by a friction ring, and players are asked not to move them out of position when handling the flagstick and if they are incorrectly positioned, shift them back to the correct position for that flagstick.
